

GripPlus

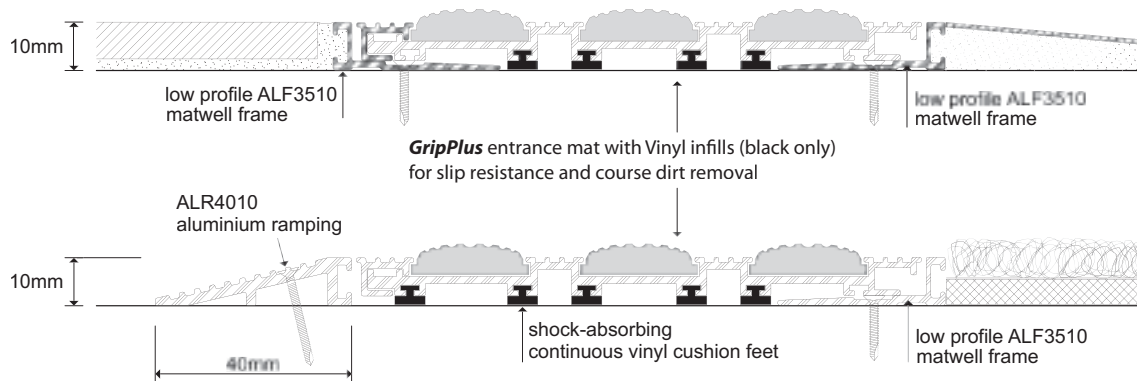

Vinyl infills for slip-resistance and coarse dirt removal

GripPlus is an attractive aluminium/vinyl strip mat using long-life, intense-wear infills in an ultra low 10mm design. The aluminium/vinyl design provides slip resistance and coarse dirt removal. Shock absorbing vinyl cushion feet run continuously from side-to-side underneath to eliminate mat clatter and provide comfort.

GripPlus mats are all custom-made to clients' specifications. Any shape or size can be made without losing structural integrity and larger size mats are made in fully interlocking sections for easy onsite assembly.

The vinyl infills are available in black with the option of anodised or powder-coated aluminium for further customisation.

GripPlus works well in all intense-wear entrances, hotels, airports, shopping malls, and public buildings. It will perform in exterior locations, exposed to the weather if needed. However, as with all entrance mats, optimum performance is achieved if the mat is located in a weather-protected area.
