

# Shuttle

## Unique roll-up design for ease of cleaning

Shuttle is a premium quality aluminium and carpet mat in a grid formation designed to match floor tile modules. This stylish mat has extra heavy duty durability and four-way traffic cleaning capacity. The patented modular design traps dirt both in and around the Coral Brush Activ polyamide infills and heavy rolling loads are accommodated with ease.

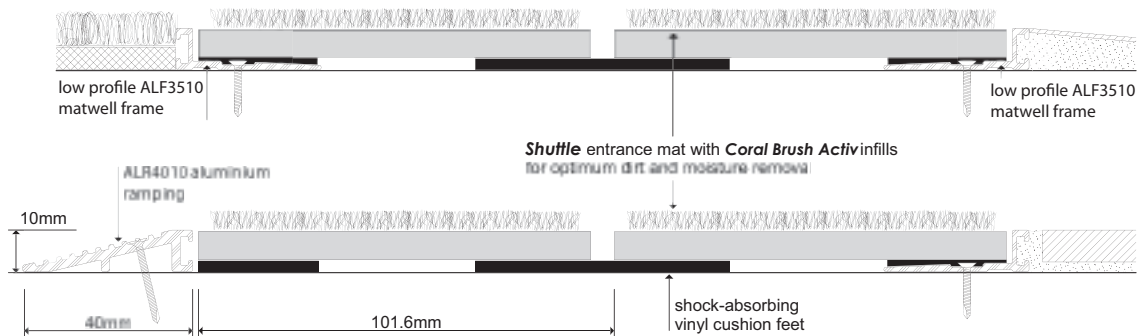

The tile design of this mat is not only high in style, but allows for it to be rolled up and removed for easy cleaning. The special 10mm low-profile design minimises the hassle of creating a floor recess for installation.

A wide range of colours and the option of powder-coated aluminium allow for complete customisation.

Shuttle is designed for prestigious intense-wear entrances, hotels, apartments and private residences, professional offices, retail outlets, banks, showrooms, entertainment venues, where presentation and durability are equally important.
