

StarTread

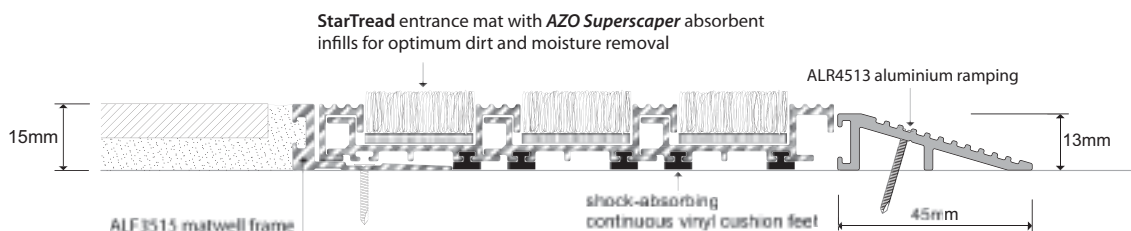

Attractive natural coir-look entrance matting

StarTread is an attractive strip mat with long-life polypropylene infills and aluminium tread rails. The coir-like infills offer optimum dirt and moisture removal, and the aluminium tread rails are specially designed to eliminate heel traps and improve traction in all conditions. Shock absorbing vinyl cushion feet run continuously from side-to-side underneath to eliminate mat clatter and provide comfort.

StarTread mats are all custom-made to clients' specifications. Any shape or size can be made without losing structural integrity, larger size mats are made in fully interlocking sections for easy onsite assembly. The mat can be surface-mounted or recessed in the proprietary matwell system.

This coir-like mat is available in natural cocos or black. The aluminium tread rails can be powdercoated or anodised to a specified colour, or you can select the standard aluminium finish.

StarTread is designed for all intense-wear entrances, shops, institutions, schools, and hostels.
